International Journal of Alcohol and Drug Research

Call for Papers Special Issue on Fetal Alcohol Spectrum Disorders

The International Journal of Alcohol and Drug Research Deadline for Submissions: March 31, 2012

The International Journal of Alcohol and Drug Research, a peer-reviewed, free-of-charge, open access journal and the official Journal of the Kettil Bruun Society for Social and Epidemiological Research on Alcohol (KBS), invites the submission of papers on biomedical, psychological, and sociological aspects related to Fetal Alcohol Spectrum Disorder (FASD), to be featured in this special issue to be published in December, 2012. Accepted papers will be published online prior to their inclusion in this special issue in order to make the research available more quickly.

Original articles (including both quantitative and qualitative research), methodological pieces, reviews, and case reports will be considered for publication and submitted for peer review, if eligible.

FASD describes permanent birth defects and encompasses a range of effects (including physical, behavioral, and cognitive) that result from maternal alcohol consumption during pregnancy. The goal of this special issue of the Journal is to publish papers that expand our current knowledge of FASD. We invite all FASD-related research be submitted, and we especially encourage submission of papers from authors in developing countries (i.e., low and middle income countries).

All submissions should be prepared in accordance with the [Author Guidelines](#) outlined in the Journal website at www.ijadr.org, and be submitted through the website.

Please indicate in the cover letter accompanying your manuscript that you would like to have the paper considered for the special issue on FASD.

Guest editors of the special issue on the FASD are Drs. Christina Chambers and Svetlana Popova. Contact information is below.

Dr. Svetlana Popova, MD, MPH, PhD
